**Learn to Read; Read to Learn**  
**Effective Exploitation of Texts**

For many learners, reading is one of the less appealing aspects of language study. This session will showcase ways of bringing the reading skill to life in class, and look at ways in which we can develop the reading skill as well as use reading as a springboard to other areas of language development. In addition to looking at how to exploit texts at different ages and levels, we will also look at ways of helping learners with unknown vocabulary they may encounter in a text and consider ways of dealing with mixed ability issues in connection with the reading skill. This will be a highly practical session aiming to provide a variety of ready-made activities to take away and use with any text - coursebook or otherwise.
